

# Senior PHP / Laravel Developer

**Company:** Redberry International

**Location:** Tbilisi, Georgia (Hybrid / Remote Possible)

**Employment Type:** Full-time

---

## About Redberry International

Redberry International is a digital product and software development company building scalable platforms and custom solutions for international clients. We value clean architecture, modern technologies, and a strong engineering culture.

---

## About the Role

We are looking for a Senior PHP / Laravel Developer who can take ownership of backend architecture, contribute to technical decisions, and mentor other developers. You will work closely with product managers, frontend developers, and DevOps engineers to deliver high-quality, scalable systems.

---

## Responsibilities

- Design and develop robust backend systems using PHP and Laravel
  - Architect scalable APIs and services
  - Write clean, testable, and maintainable code
  - Optimize performance and database queries
  - Review code and mentor mid/junior developers
  - Participate in technical planning and system design
  - Collaborate with cross-functional teams
- 

## Requirements

- 5+ years of professional experience in PHP development
  - Strong expertise in Laravel framework
  - Solid understanding of OOP, SOLID principles, and design patterns
  - Experience with RESTful API development
  - Strong knowledge of MySQL or PostgreSQL
  - Familiarity with caching systems (Redis) and queues
  - Experience with Git and CI/CD workflows
  - Good communication skills in English
-

## Nice to Have

- Experience with Vue.js or other modern frontend frameworks
  - Knowledge of Docker and cloud environments
  - Experience with automated testing (PHPUnit)
  - Understanding of microservices architecture
- 

## What We Offer

- Competitive salary
  - Flexible working environment
  - Opportunity to work on international projects
  - Professional growth and learning support
  - Collaborative and innovation-driven team
- 

If you are passionate about building high-quality software and want to contribute to impactful projects, we would love to hear from you.
